MATERIAL: FLEXIBLE ROUND TINNED COPPER BRAID

HARDWARE: Not Applicable

TESTING:

SALES DRAWING No: TEMPLATE DRAWING

NOTE: The “RCB” Round Braid consists of one or more electro tinned copper sections. Copper ferrules are formed onto the ends of the braids under high pressure to produce solid rectangular palms. Specify length in (mm) of braid required. All sizes are nominal values. All Braids can be covered with Heatshrink upon request, note this will derate the current carrying capacity.

The “RCB” Flexible Round Copper Braids are stocked in a Single Type:
 390A – Stranding – 19/7/14/0.25mm O/A 48/6/0.25
 Nominal Cross Section Area – 110mm²

*****Custom made sizes available upon request*****

**FILL OUT BRAID TEMPLATE IN CATALOGUE IF YOU REQUIRE A CUSTOM MADE SIZE.
 MINIMUM ORDER QUANTITIES MAY APPLY**
